

EXAMPLE OF PAYMENT FLOW

Generally, Payment Flow is a transaction flow about how transactions and payment are made on your business' website. For example:

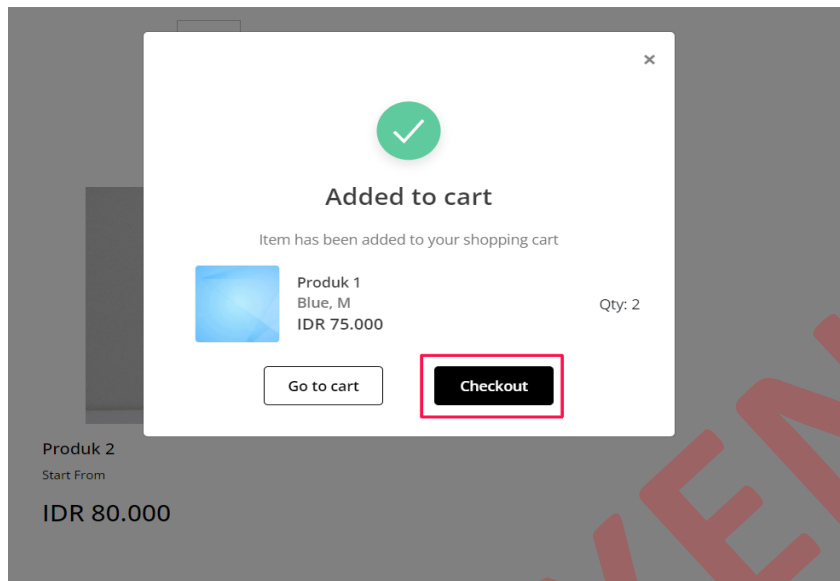

1. Customer access website: <https://xendit.store/xenditstoreexample> (show front-page of your website)

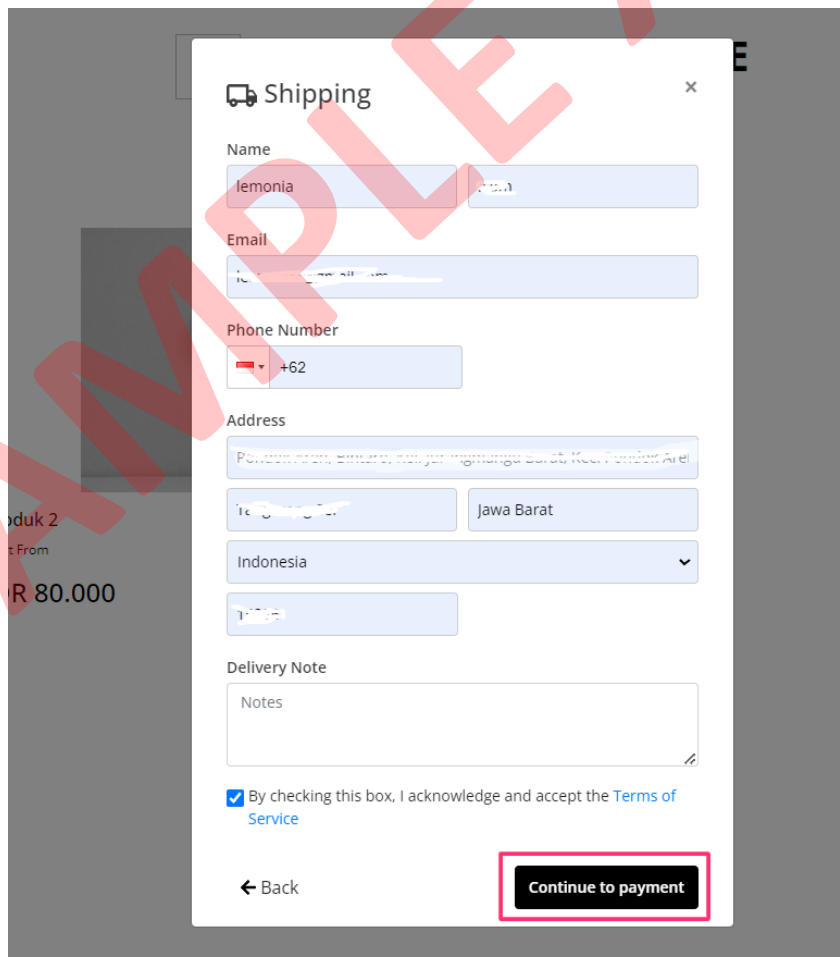

2. Customer click on the product they want to buy and click "Add to Cart"

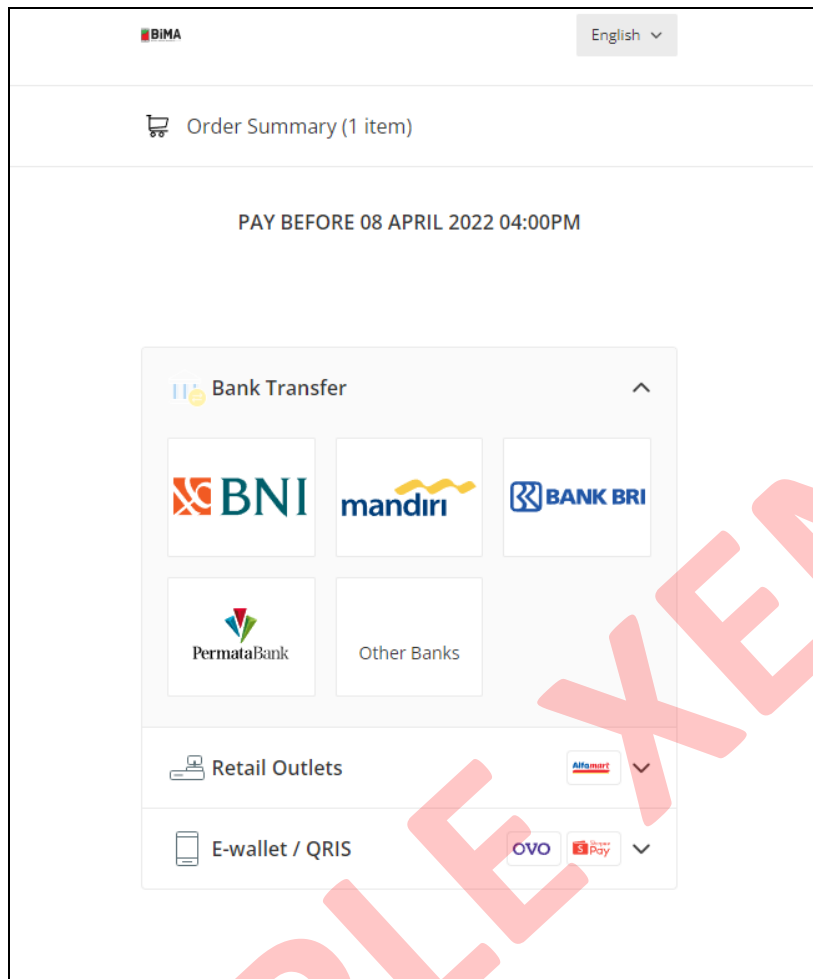

3. After adding product to Cart, customer proceed to checkout page07/04 DONE EMAIL MERCHANT

4. Customer filled-in Shipping Details and Continue to Payment

5. Click on the Available Payment Method

6. Customer proceed to pay & transactions are completed
